Dangerous Goods

Some everyday products, like aerosol spray starch, can be dangerous when transported on the aircraft in carry-on and/or checked baggage. Changes in temperature or pressure can cause some items to leak, generate toxic fumes or start a fire. Carriage of prohibited items may result in fines or in certain cases imprisonment. Please ensure there are no forbidden hazardous materials in your baggage like:

Some lithium batteries (e.g., spares in checked baggage, batteries over a certain size)
Explosives / Fireworks
Strike anywhere matches / Lighter fluid
Compressed gases / Aerosols
Oxygen bottles / Liquid oxygen
Flammable liquids
Pesticides / Poison
Corrosive

There are special exceptions for small quantities (up to 70 ounces total) of medicinal and toilet articles carried in your luggage, spare lithium batteries for most consumer electronic devices in carry-on baggage, and certain smoking materials carried on your person. Baggage may contain items that are required to be carried with you onboard the aircraft. For example, spare lithium batteries for portable electronic devices and cigarette lighters must be removed from checked or gate-checked baggage and carried onboard the aircraft. Traveling with medical oxygen, liquid oxygen, mobility aids and other assistive devices may require airline pre-approval or be restricted from carriage entirely. Passengers requiring these items should contact the airline operator for information on use of such devices.

For further information check our information pages or contact our customer service desk.

You may also visit the [Transportation Security Administration \(TSA\) website](http://www.tsa.gov/traveler-information) (<http://www.tsa.gov/traveler-information>), for a list of items that can and cannot be transported on passenger aircraft.
